Formuepleje Safe

Formuepleje Fund Management A/S

STRATEGY DESCRIPTION

Using classical portfolio theory, Formuepleje Safe invests in equities and bonds with the goal of optimizing the relationship between the expected return and the risk of the investment. In order to increase the risk as well as the expected return, Formuepleje Safe does not increase the weight of equities in the portfolio. Rather, the fund uses leverage in order to purchase more of the optimal investment and maintain the original ratio between equities and bonds. On a five year horizon, the expected return is 70 percent.

FUND INFORMATION
