

Asset Opportunities

STRATEGY DESCRIPTION

Asset Opportunities relies on an active multi-asset investment strategy to invest in a range of asset classes and instruments. With a dynamic investment strategy and proven decision-making model, the fund's portfolio management team adapts the portfolio's risk on a daily basis to their expectations for the financial markets. Through the selection and composition of asset classes and instruments, Asset Opportunities actively turns up and down the portfolio's risk. The team creates a portfolio with a relatively high risk profile in the phases of expected favorable development in the financial markets and more importantly, the strategy ensures a relatively low risk profile in the phases where markets are expected to face significant losses.
